

**Collaborative Crop Breeding
R&I for a Green Europe**

Funded by
the European Union

BUILDING EUROPE'S CROP BREEDING COMMUNITY

to shape future research priorities, funding and collaboration
for resilient, sustainable crops.

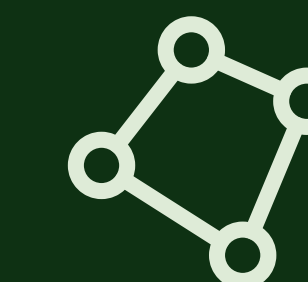

1 June 2026 -
30 November 2028

17 partners
13 countries

Budget:
3M EURO

Coordination &
Support Action

OBJECTIVES AND PATHWAYS TO IMPACT

Engage Relevant Stakeholders

- Build an EU-wide crop breeding R&I community.
- Integrate needs of researchers, breeders, farmers, industry, policymakers, and consumers.

Identify Priorities & Gaps

- Map research gaps, technological bottlenecks, and infrastructure needs.
- Cover all breeding systems.
- Propose innovative, long-term funding models for the full breeding cycle.

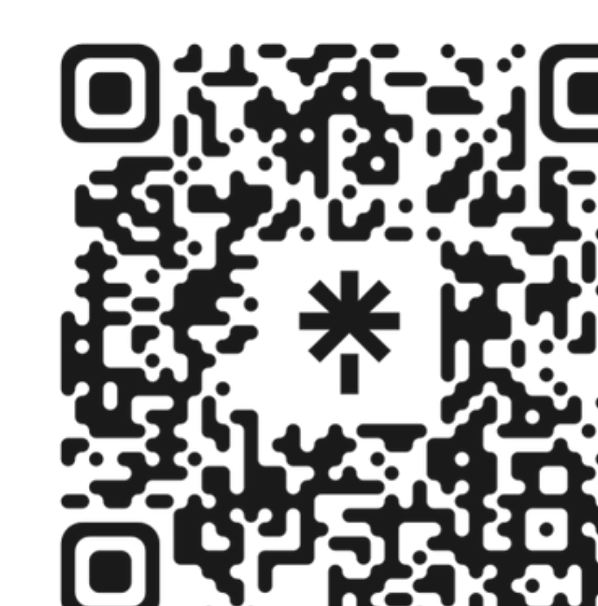

Design a European Collaboration Framework

- Lay the foundation of the governance and a sustainable funding network.
- Accelerate development of improved crop varieties aligned with EU strategic goals.
- Stronger breeding ecosystem, better funding alignment, faster innovation transfer, SME support.

EXPECTED RESULT

A European roadmap and implementation strategy for a coordinated crop breeding research & innovation (R&I) funding network, uniting public and private sectors.
