EU AgRI 2040 CONFERENCE

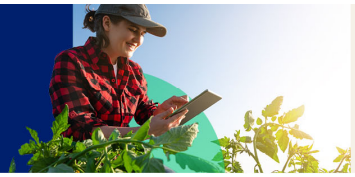

COLiBRI

Collaborative Crop Breeding R&I for a Green Europe

Funded by the European Union

Project 101288631

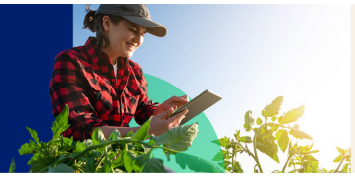

Plant breeding R&I is a cornerstone of Europe's response to emerging challenges

- Climate change
- Food and nutritional security
- Biodiversity
- Agricultural competitiveness

Resilient, diverse and adapted crops

COLiBRI

A more coordinated approach can strengthen European crop breeding R&I

Shared priorities for plant breeding R&I

Addressing climate change, biodiversity loss, food and nutritional insecurity, and agricultural competitiveness.

Better coordination of resources

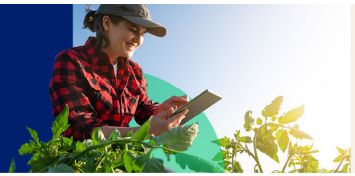

Connecting plant breeding needs, research infrastructure and funding landscapes to support long-term approaches to plant breeding R&I.

A framework for long-term support

Supporting a future EU-wide plant breeding network and funding mechanism.

Towards a European roadmap, implementation strategy and long-term support for plant breeding R&I

COLiBRI

Europe has extensive crop breeding expertise. The challenge is translating it into coordinated European plant breeding R&I priorities and long-term support.

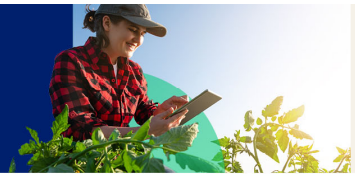

Plant breeding needs & gaps

Infrastructure

Funding

Stakeholder perspectives

COLiBRI

COLiBRI develops a European roadmap and framework for future collaboration

01

LISTEN

Gather stakeholder needs and perspectives

02

UNDERSTAND

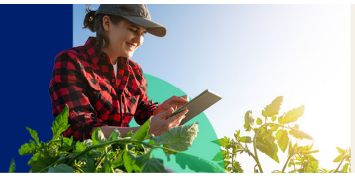

Map plant breeding needs, gaps, infrastructure and funding landscape

03

DEVELOP

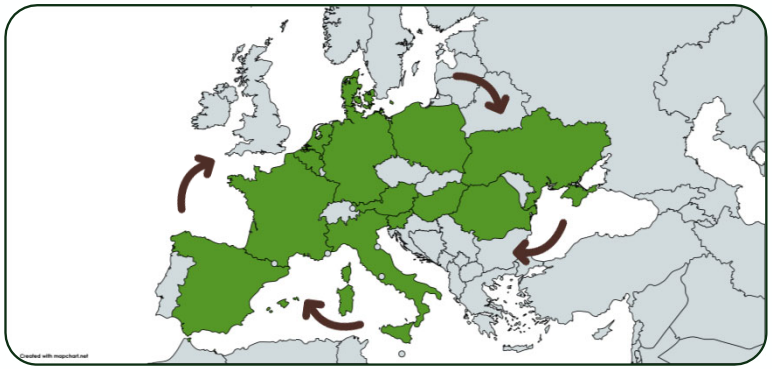

Create a roadmap, implementation plan and framework for a future EU-wide breeding network

COLiBRI

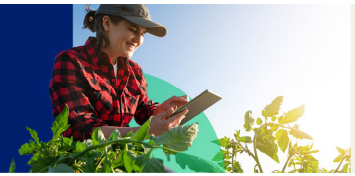

Building a shared direction starts with diverse perspectives

- Researchers
- Breeders
- Networks
- Farmers
- Infrastructures
- Policy actors
